World Bank Perspectives on Poverty in Southeast Asia Subregion Challenges and Priorities for SDG 2030.

This book explores issues related to poverty in South Asia in a two-pronged manner—by focusing on injustice created and perpetuated through structural and institutional practices and institutionally entrenched injustices (for example, in relation to inheritance). The challenges of an interlinked and integrated agenda require governments to build more inclusive, sustainable, and prosperous societies.

Global Agenda for Social Work and Social Development: Why is inclusive and sustainable growth critical to Agenda 2030 and the Sustainable Development Goals (SDGs)?

The UN Economic and Social Commission for Asia and the Pacific (ESCAP) has noted that Southeast Asian development strategies were, from the outset, much more focused on economic growth compared to growth that is pro-poor and inclusive. This has exacerbated inequality and injustice. The implementation challenges and the role of strategic actors in overcoming some of the challenges they face, provided that resources are managed in a way that supports and facilitates the development goals.

UNICEF has identified the emerging health challenges facing the urban poor in Bangladesh as a result of rapid urbanization, lack of infrastructure, and inadequate social services. To improve slum conditions, integrated urban development efforts are needed.

Strategic Actors for Inclusive Development: Dutch knowledge, political governance of the countries of South Asia by economically and technically competent states; governance and human rights; and economic and trade development. In overcoming some of the challenges they face, provided that resources are managed, South Asia is characterized by its large population, growing poverty, weak governance, and human rights issues.
